Self-Starter

PROFESSIONAL PROFILE

A competent and enthusiastic Web Development Student looking to embark on a rewarding career path with a progressive employer. Knowledge of designing and developing the layout, visual appearance and functionality of a website. Proven track record of successfully completing projects from concept through to design and deployment.

PROJECTS

MOVIE HUB

The Movie Hub App was a collaboration between four fellow classmates and myself. It is first and foremost device agnostic, and a prime example of User Interface Design. It was styled using Materialized CSS and features both the OMDb and TheMovieDB APIs.

WEATHER DASHBOARD

Using the OpenWeather API to retrieve weather data for various cities, I've constructed a Weather App that allows a user to search for a city, and then presents them with both the current weather forecast, as well as a five day future forecast for that city. The App utilizes HTML, Bootstrap, CSS and jQuery, and features the OpenWeather API.

DAY PLANNER

My Daily Planner App allows the user to input and save events for each hour of the day. It runs in the browser, utilizes Local Storage and dynamically updated HTML and CSS powered by jQuery, and features the Moment.js library.

EDUCATION

UNIVERSITY OF MINNESOTA, (1992-1996)

BA in both Film Studies and Art History. Courses included all aspects of Film Studies as well as Cultural Studies and Comparative Literature, and Journalism

TRILOGY EDUCATION CODING BOOTCAMP

Currently pursuing a certificate in Full Stack Web Development
